SUMMARY

Frontend Developer specializing in Next.js and React, with a passion for building responsive, high-performance, and user-centric web applications. I combine development skills with a working knowledge of Figma to bridge the gap between design and implementation, ensuring seamless user experiences. I'm always eager to learn, collaborate, and contribute to building digital products that are both functional and visually impactful.

EDUCATION

Poornima College of Engineering, Jaipur **2021 - 2025**
B.Tech (CSE) | 8.70 CGPA

PROFESSIONAL EXPERIENCE

HG Technologies | Frontend Developer **July 2025 – Present**

- Develop responsive, scalable and extensible web applications using React.js, Next.js, JavaScript, Tailwind CSS, and Material UI.
- Build reusable components and improve UI performance, responsiveness, and user experience.
- Improved user experience by enhancing navigation, responsiveness, and interface consistency across devices.

HG Technologies | Graduate Engineer Trainee **Jan 2025 – June 2025**

- Collaborated with designers and developers to build responsive, user-friendly interfaces.
- Translated design mockups and business requirements into functional UI components.
- Gained hands-on experience with Git, API integration, and frontend development workflows.

H.G. Infra Engineering Ltd. | Software Development Intern **July 2024 – Dec 2024**

- Learned and practiced frontend development using React.js, Next.js, JavaScript, Tailwind CSS.
- Created presentations and proposal decks to communicate project ideas, scope, and visual direction clearly.
- Supported UI mockups, layout improvements, and responsive interface work while gaining hands-on exposure to project workflows.

SKILLS

- **Design Tools:** Figma, Canva, PowerPoint
- **Frontend Development:** HTML, Tailwind CSS, JavaScript, TypeScript, React.js, Next.js, Material UI, Redux, Hooks, SSR, SSG
- **Visual & Business Design:** Proposal Deck, Landing Pages
- **Cloud / DevOps:** Git, GitHub Actions, CI/CD, Agile/Scrum

PROJECTS

All About Packing (Link)

- Worked on UI design and frontend development for All About Packing, an e-commerce platform for packaging products, creating intuitive interfaces and seamless shopping flows (category browsing, product listing, filtering).
- Developed responsive and user-friendly frontend interfaces using React, Next.js, HTML, CSS, Tailwind CSS, and Material UI.
- Optimized UI responsiveness, usability, and component reusability following modern frontend development practices.
- Participated in regular project discussions and incorporated feedback into frontend enhancements.

BuildSync (Link)

- Developed frontend interfaces using Next.js and Tailwind CSS, improving usability across modules such as Machine Allocation, Time Logs, RFI, and Dashboard Analytics.
- Developed enterprise dashboard screens with real-time data visualization and intuitive user interfaces.
- Participated in Agile development processes, code reviews, debugging, and feature enhancements.
- Resolved UI bugs and optimized frontend functionality based on testing and feedback.
- Worked on multiple enterprise modules, including Material Management, Direct Procurement and Administration.

Equipmint (Link)

- Developed responsive and scalable frontend interfaces for a B2B construction equipment marketplace using React, Next.js, JavaScript, Tailwind CSS, and Material UI.
- Developed intuitive interfaces for buying, selling, and renting construction equipment, ensuring a seamless user experience.
- Optimized application responsiveness and ensured compatibility across desktop, tablet, and mobile devices.
- Contributed to UI improvements based on stakeholder and user feedback.
- Implemented interactive UI elements to improve overall user engagement.
